

Scott Ivan

Platform Engineer | DevSecOps | Cloud Native

scottivan.com · github.com/scottivn · linkedin.com/in/scott-ivan-4a2905134

Platform engineer with 6+ years building and operating enterprise Kubernetes infrastructure at USAA. Transitioned from on-premises OpenShift to leading EKS platform engineering, designing a three-tier cluster management architecture with Argo CD. CKA certified with a Machine Learning certificate from Cornell University. Builder of PatientSynapse — an AI-powered HIPAA-compliant workflow automation platform for healthcare. Passionate about GitOps, policy-as-code, and developer platforms.

EXPERIENCE

Platform Engineer — DevSecOps

USAA · EKS / DevSecRegOps Team

2025 – Present

- Architecting a three-tier EKS cluster management platform using Argo CD for cluster syncs and lifecycle management across enterprise environments
- Building GitOps-driven infrastructure pipelines for multi-cluster governance with automated drift detection and reconciliation
- Designing DevSecOps-native workflows integrating security scanning, policy enforcement, and automated compliance checks into CI/CD
- Leading shift-left security practices with OPA/Kyverno policy-as-code for cluster governance and admission control

EKS · Argo CD · Kubernetes · Terraform · GitOps · OPA · Kyverno

Platform Engineer — Containers as a Service

USAA · OpenShift / On-Prem Cloud Team

2019 – 2025

- Built and managed enterprise-scale OpenShift clusters across on-premises data centers supporting hundreds of application teams
- Automated cluster provisioning, day-2 operations, and lifecycle management at scale using Ansible and custom Python tooling
- Developed internal tooling for cluster monitoring, alerting, and self-service developer workflows reducing onboarding time
- Collaborated cross-functionally to migrate workloads to containerized infrastructure, improving deployment velocity and resource utilization

OpenShift · Kubernetes · Ansible · Python · Helm · Prometheus · Grafana

Teaching Assistant — Computer Science

University · Data Structures & Algorithms

2017 – 2019

- TA for introductory and intermediate CS courses covering data structures, algorithms, and object-oriented programming
- Led weekly lab sessions, office hours, and code reviews for 30+ students per semester

PROJECTS

PatientSynapse

patientsynapse.com

- Full-stack AI automation platform for a sleep medicine practice — automates the fax-to-EMR pipeline: inbound faxes are OCR'd, run through an LLM extraction layer, matched to FHIR R4 patient records,

and pushed directly into the EMR

- HIPAA-compliant audit logging, JWT + SMART on FHIR OAuth2, RBAC with role-scoped UI and backend guards
- Manages DME/CPAP supply lifecycle, HMO referral authorization tracking, and insurance allowable rate lookups
- Deployed on AWS EC2 behind nginx with Let's Encrypt TLS and AWS Secrets Manager for credential injection

FastAPI · React · PostgreSQL · FHIR R4 · LLMs · OCR · AWS · JWT/RBAC

TECHNICAL SKILLS

Cloud & Orchestration	Kubernetes, EKS, OpenShift, Helm, Kustomize
GitOps & CD	Argo CD, Argo Workflows, FluxCD, GitHub Actions
DevSecOps	OPA, Kyverno, SAST/DAST pipelines, Policy-as-Code
IaC & Automation	Terraform, Ansible, CloudFormation, Python, Go
Observability	Prometheus, Grafana, OpenTelemetry, Loki
Languages	Python, Go, Bash, TypeScript

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)	2023
Cloud Native Computing Foundation (CNCF)	
Machine Learning Certificate	2023
Cornell University	

EDUCATION

B.A., Computer and Programming Sciences
Minor in Mathematics
Teaching Assistant — Data Structures & Algorithms
